# Safe Working Starts Here

Your employees deserve the best eye and hearing protection, without the hassle. Yet many companies struggle with the complexity of laws and regulations, the time it takes to arrange everything, and the fear of hidden costs. We understand that.

### Your challenges

- ✓ Finding the right protection is **complex and time-consuming**
- ✓ Changes in **laws and regulations** are difficult to keep track of
- ✓ Insufficient protection leads to unnecessary **risks and absenteeism**
- ✓ Protection must be arranged **quickly, simply and affordably**

# We Help Your Organisation

From advice to delivery, we ensure your employees always have the right eye and hearing protection.
Transparent, simple and fully tailored to your wishes and the Working Conditions Act.

### Simple ordering process

With just a few steps you can quickly and easily order for one or more people. Need help? Our specialists are ready to assist you.

### Specialist range

Order safety glasses, computer glasses, hearing protection and more for your organisation. Always supplied with the correct certifications.

### Always a store nearby

Fitting and advice at 400+ Hans Anders stores in the Netherlands and Belgium, carried out by trained opticians and audiologists.

### Rely on fast delivery

In collaboration with our trusted delivery partners, we ensure the fastest delivery times within your sector and region.

### Usage insights

Get full insight into the current status of your order forms, inspection reminders and invoicing, all managed in one place.

### 100% guaranteed satisfaction

Do you have a problem or question? Our experts are ready for you and always offer a tailored solution.

# Personal Service of the Highest Level

Every workplace is different. Therefore, eye and ear protection requires a tailored approach. Our team helps you with personal advice and expert support, so you always make the right choice. Safety starts with the right protection.

### Guarantee quality

As an ISO 9001 and ISO 14001 certified company, we meet the highest standards in quality management and environmental management. This means our products are not only reliable and durable, but also produced and delivered according to strict procedures.

### World-class service

At Seeh, service means more than just delivering products. That is why we provide expert advice, an efficient ordering process and timely delivery. With an NPS score of 74+, we prove time and again that we deliver world-class service. We are proud of that.

# Over 20 Years of Exclusive Partnership

Seeh has been the leading business partner for companies that want to properly arrange eye protection for over 20 years. Thanks to our exclusive collaboration with Hans Anders and Alpine, we accelerate innovation, improve product development and optimise our service.

This way we offer companies high-quality eye and hearing protection with the best price-quality ratio, via a nationwide network of 400+ stores close to home or workplace.

## Quality with certification

Discover our

# Prescription Safety Glasses

# Prescription Safety Glasses

Protection and clear vision go hand in hand with our high-quality prescription safety glasses. In collaboration with Hans Anders we offer a tailored solution, so your employee always sees safely and sharply.

### Strictest safety standards

All safety glasses meet the strictest safety standards, such as NEN-EN-ISO 16321:2022.

### Superior coatings

High-quality coatings provide maximum protection and comfortable work.

### Highest optical clarity

Our lenses are standard thin-ground. Safety and comfort without compromise.

### Comfortable frames

Thanks to the high wearability acceptance, our frames fit perfectly in every workplace.

# Certified Quality

At Seeh, service means more than just a delivery. Our custom eye protection meets strict requirements and must fit perfectly. That is why we provide expert advice, an efficient ordering process and timely delivery.

## NEN-EN ISO 16321-1:2022 certified

Our safety glasses are certified according to the NEN-EN ISO 16321-1:2022 standard, the strictest standard for eye protection worldwide. With stricter tests and requirements, this standard replaces several older standards, including EN 166. This means our products are not only reliable and durable, but also produced and delivered according to strict procedures.

## Always according to the highest standards

We don't just promise quality, we guarantee it. As an ISO 9001 and ISO 14001 certified company we meet the highest standards for quality management and environmental management.

More about us

# Discover the Power of Coatings

During many activities, harmful substances and materials are released without employees noticing. It is therefore essential to optimally protect the eyes of your employees. Our prescription safety glasses are equipped with various high-quality coatings that provide extra protection and comfort. Below you will find an overview of the available coatings and the associated benefits.

### Scratch-resistant

This hard top layer increases the surface hardness, reducing mechanical damage from dust, tools or rough contact.

### Anti-fog

The inside of the lens has a hydrophilic coating that immediately spreads condensing water droplets into an even, transparent layer.

### Anti-reflective

This coating reduces reflections from lamps, screens and sunlight. This provides sharper vision in environments with strong or changing lighting.

### Water-repellent

The outside of the lens has a hydrophobic coating. Water droplets roll directly off the lens without leaving a disturbing haze.

### Super coating

Our super coating forms an additional protective layer that strengthens the lens and the other coatings by up to 70 times.

# The Right Lens Line for Every Team

The price of a prescription safety glass depends partly on the chosen coatings. These are tailored to your specific activities and the associated risks. We offer our coatings in three product lines: Black Line, Top Line and Superior Line. Below you will find an overview of the main differences between these three lines.

## Black Line

Provides exactly what is needed for safe work and is known for its scratch-resistant effect. A very reliable choice.

**Black Line coatings**

- ✓ Scratch-resistant
- × Water-repellent
- × Anti-reflective
- × Anti-fog
- × Super coat

## Top Line

The same as the Black Line, but with better water-repellent and anti-reflective coatings. Very comfortable vision.

**Top Line coatings**

- ✓ Scratch-resistant
- ✓ Water-repellent
- ✓ Anti-reflective
- × Anti-fog
- × Super coat

## Superior Line

Most popular

The Superior Line offers up to 70 times more protection thanks to the super coat. The best choice for a worry-free working day.

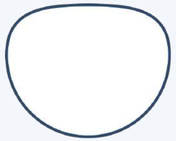

**Superior Line coatings**

- ✓ Extra scratch-resistant
- ✓ Extra water-repellent
- ✓ Extra anti-reflective
- ✓ Anti-fog
- ✓ Super coat

Discover our price list

# Top-Class Lenses

The prescription safety glass should not only provide the best protection, but also have a high wearing comfort. It is therefore essential to choose the right type of lens. Our prescription safety glasses are available in three versions: single vision, multifocal and multifocal optimal.

## Single Vision

Single vision lenses provide support for near or distance vision. This is sufficient for wearers who do not need a reading area.

- Lenses with one strength
- Support for near or distance vision
- Most suitable for people up to 40 years

## Multifocal

Multifocal lenses provide support for both near and distance vision. Necessary for wearers who need a reading area.

- Lenses with multiple strengths
- Support for near and distance vision
- Often necessary from age 40 and older

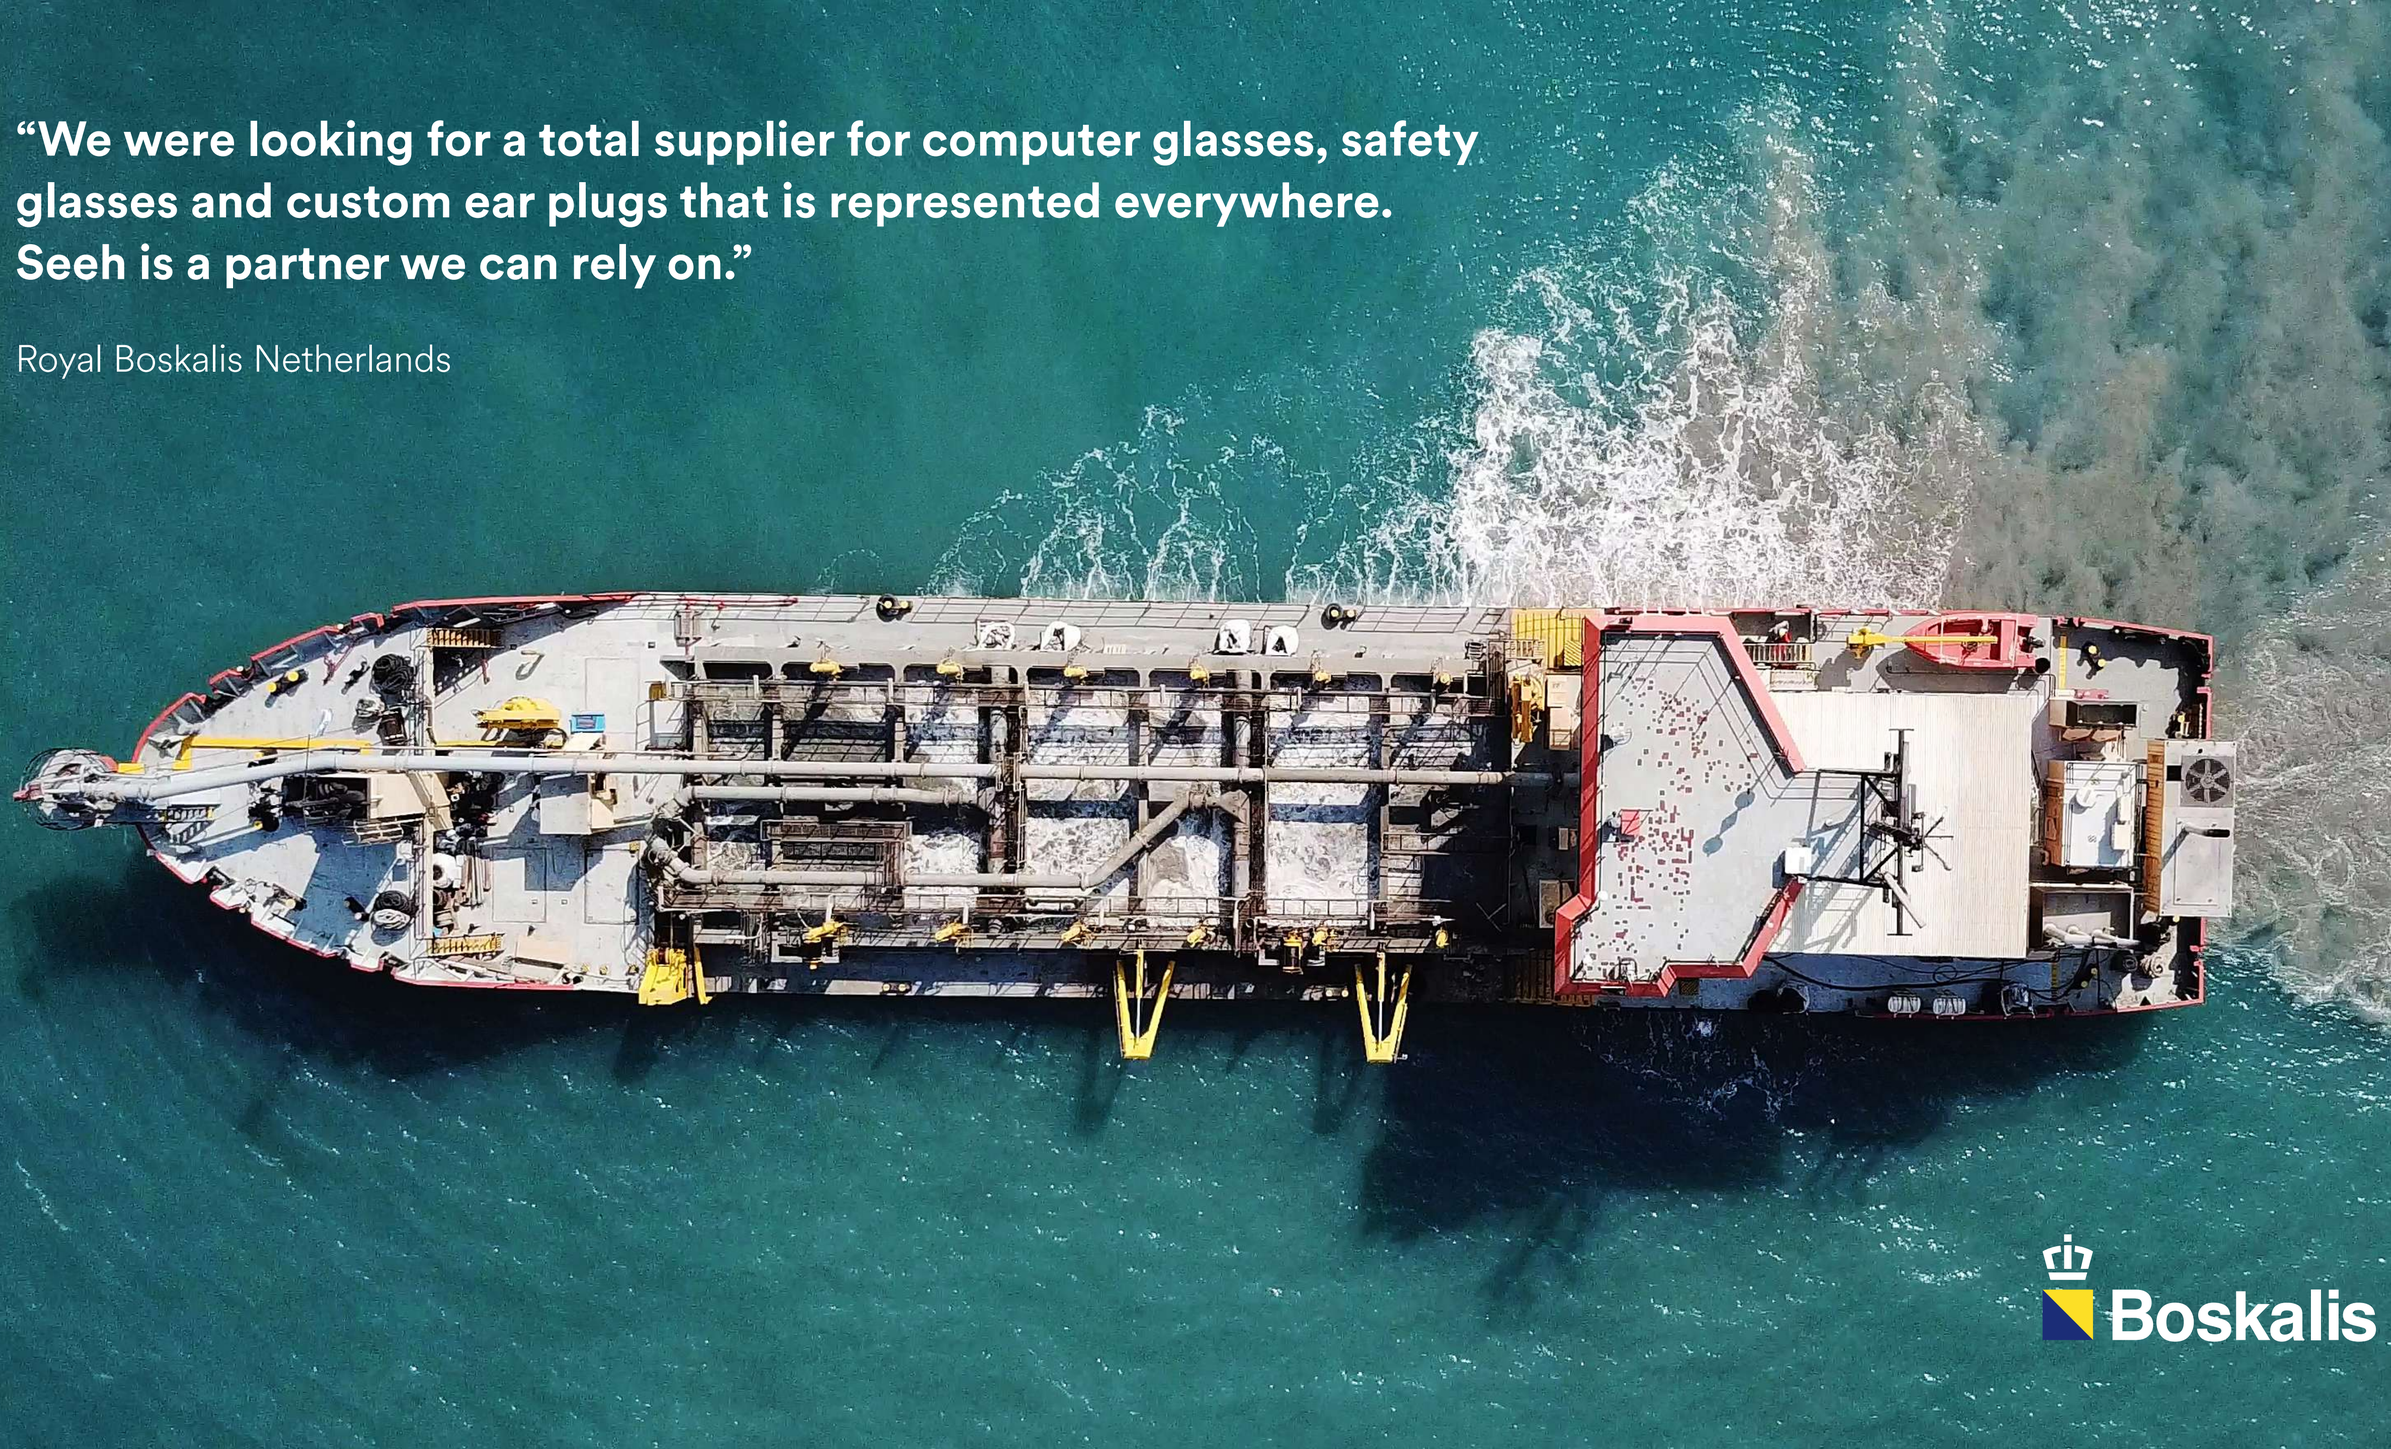

## Multifocal Optimal

Our Multifocal Optimal lenses offer maximisation of the field of view and reading area. Minimal distortion and improved stability.

- The best multifocal lenses
- Larger field of view and more comfort
- Natural and stable vision without distortion

**“We were looking for a total supplier for computer glasses, safety glasses and custom ear plugs that is represented everywhere. Seeh is a partner we can rely on.”**

## It Starts with the Right Frame

Safety and comfort go hand in hand with our prescription safety glasses. All our new frames have a CE marking and comply with the new ISO 16321 standard. The excellent fit also ensures a high degree of comfort. This leads to high acceptance by the user.

Our collection consists of 10 stylish plastic frames and 6 more classic metal frames. This gives your employees all the freedom to choose a model that perfectly matches their personal style and their work activities.

Discover our product catalog

# Accessoires and options

With every prescription safety glass we supply a free storage case, a lens cloth and a glasses cord. It is also possible to add extra options, such as a sun lens and photochromic lens.

| Options / Accessoires | Frequency |
|---|---|
| Storage case | With every pair of glasses |
| Lens cloth | With every pair of glasses |
| Glasses cord | With every pair of glasses |
| Sun lenses | Optional |
| Photochromic lenses | Optional |
| Bluefilter | Coming soon |

Our safety glasses last a long time and prevent waste. We limit waste and energy consumption and use recyclable materials where possible. All accessories are, for example, made from 100% recycled PET bottles.

# Prescription Computer Glasses

## for Your Employees

# 40%

**of employees work 6 hours or more behind a screen daily**

# 14%

**of sick days are caused by complaints related to screen work**

**Sources**

TNO, Factsheet Screen Work 2023

TNO/CBS, NEA 2022

## Facts about Screen Work and Health

Many employers do not realise that screen work is an important cause of absenteeism and loss of productivity. Employees who work long hours behind a screen every day more often experience complaints about their eyes, neck and shoulders. This leads not only to discomfort, but also to a higher risk of absenteeism.

### Your challenges

- ✓ Higher risk of absenteeism and loss of productivity
- ✓ Employees experience discomfort and fatigue, which reduces job satisfaction
- ✓ Legal obligations around screen work are often underestimated

# Our Prescription Computer Glasses

Fatigue, dry eyes and headaches are common among employees. A standard pair of glasses or contact lenses are often not sufficient, because screen work requires a different viewing distance. With a prescription computer glass, your employees work more comfortably, see more sharply and complaints are prevented. This leads to less absenteeism and more productivity.

### Worksafe lenses

Advanced grinding technology optimises the field of view for digital screens

### Wide choice of frames

Various styles and price ranges, fitting within every company budget

### Optimal viewing distances

Three specialised lens options tailored to different workplaces and situations

### Advanced coatings

Optionally available with scratch-resistant, anti-reflective, and blue light filter coatings

# The Benefits of Computer Glasses

Many employees who work behind a screen without the right glasses tend to lean their head forward or squint to see better. This often leads to a poor working posture, which can result in neck and back complaints.

### No glasses

- ✕ Wrong posture
- ✕ Dry, burning eyes
- ✕ Poorer sleep
- ✕ Increased risk of absenteeism

### Regular glasses

- ✕ Poor posture
- ✕ Neck and back problems
- ✕ Less efficient working
- ✕ Increased risk of absenteeism

### Computer glasses

- ✓ No dry eyes
- ✓ Natural posture
- ✓ Less neck and back issues
- ✓ More efficient working

**“Seeh provides a smooth and digital process for computer glasses requests. This makes everything run efficiently and seamlessly, from request to delivery.”**

Haaglanden Medical Centre

# The Right Lenses for Everyone

Computer glasses are the right solution for everyone who works behind a screen for extended periods, with specially ground lenses for the optimal viewing distance.

**Multifocal WorkForce**

With these lenses you can see clearly both near and far

**Single Vision**

Corrects vision at one distance: near or far

**Nearview (up to 1 metre)**

For reading and screen work carried out at the same workstation

**Midview (up to 2 metres)**

For people who work at a medium distance from the screen

**Longview (up to 6 metres)**

For people who work at a longer distance from the screen

# Choice of Two Lens Lines

Our computer glasses are available in two lens lines. Both lines have been developed for daily use with attention to comfort, durability and reliability. They fully comply with the Working Conditions Act and seamlessly match professional screen work. The difference is in the details: how relaxed your eyes feel at the end of the working day, how comfortable the glasses remain to wear and how long the quality is maintained. Whichever lens line you choose, you always choose peace, reliability and a solution that optimally supports every working day.

## Basic Lenses

Our Basic computer lenses provide exactly what is needed for comfortable screen work. Equipped with scratch-resistant and anti-reflective coating for clear vision and daily use. Reliable, simple and effective.

### Basic coatings

- ✓ Scratch-resistant
- ✓ Anti-reflective
- × Transparent coating
- × Repellent coating
- × Blue filter

## Ultra Lenses

The Ultra lenses offer maximum working comfort and go beyond simply complying with regulations. This lens line is the choice for organisations that want to minimise absenteeism and other risks as much as possible.

### Ultra Coatings

- ✓ Ultra scratch-resistant
- ✓ Ultra anti-reflective
- ✓ Ultra transparent
- ✓ Ultra repellent (water/dirt/grease/dust)
- ✓ Ultra protection against blue light

Discover the prices of our lenses

# Always a Suitable Frame

Frames for computer glasses are available in various styles, materials and shapes, so there is always a frame that suits your face and personal style. From classic and timeless to modern and striking, every frame combines comfort with quality.

## Hans Anders Frames

Frames from the Hans Anders collection are designed to offer you the best value for money. Discover a wide collection of stylish frames at a very reasonable price.

## Ciircle Frames

Sustainable choice

The Ciircle frames are made from old glasses frames and recycled materials. These sustainable frames are available in various distinctive styles and different price ranges.

## Exclusive Brand Frames

At Hans Anders you can also find a diverse range of brand frames. Think of brands such as Vogue, Ray-Ban, GANT, Ralph Lauren and many more exclusive brands.

# A Tailored Policy for Computer Glasses

How do you ensure your employees receive the right protection while keeping the budget manageable? We make it simple with a policy for computer glasses, a streamlined process in which you determine what is reimbursed.

### Maintain full control

Prevent unnecessary expenses and determine for yourself how your budget is spent

### Comply with regulations

As an employer you must ensure a healthy workplace, this also applies to screen work

### Protection for everyone

Every employee gets the same access to suitable computer glasses

### We are here for you

Do you need help setting up a policy? Then we are happy to help you

Brochure Seeh B.V. EN 1E26-03

Always the Right

# Custom Hearing Protection

**Source**
Tired of Noise (2025),
Published by Arboportaal

## The Importance of Good Protection

According to the research report *Tired of Noise (2025)*, an estimated 900,000 employees work daily in an environment with harmful noise levels. This group is at risk of permanent hearing damage and long-term absenteeism.

The most disturbing sounds come from machines and equipment, but in offices ambient noise can cause irritation and concentration problems. Good custom hearing protection is therefore essential in virtually every sector.

Furthermore, from 80 dB(A) onwards, employers are legally required to provide hearing protection and supervise its use.

### Benefits of custom hearing protection

- ✓ Optimal protection because of a perfect fit
- ✓ Reduces (long term) absenteeism
- ✓ More sustainable than disposable solutions
- ✓ Leads to higher productivity

# Custom Hearing Protection

Together with our partner Alpine we offer custom hearing protection with the highest wearing comfort. Whatever activities your employees carry out, we ensure they are protected against harmful noise.

### Custom ear plugs for work

Suitable for various work environments. Certified and tested for optimal safety.

### Maximum comfort

Always custom made, so the ear plugs fit perfectly and provide optimal comfort.

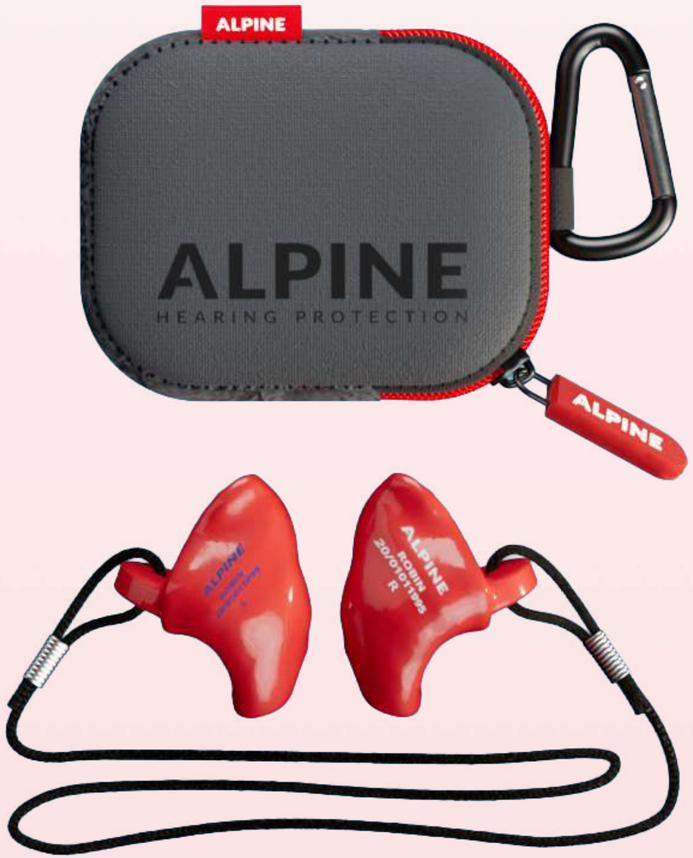

### Suitable guarantee

You have a 3-month fit guarantee and a 12-month manufacturer's guarantee. If needed, we replace the filter free of charge.

### Years of safe working

Because custom earplugs last for years, they are more sustainable than disposable plugs that need to be replaced daily.

# Protection as It Should Be

Many people work daily in environments with harmful noise levels. Did you know that hearing damage is one of the most frequently reported occupational diseases? From 80 dB(A), employers are already obliged to make hearing protection available and to supervise its use.

## The right certification

Our custom earplugs are made to measure and equipped with special acoustic filters tailored to the specific work environment. They reduce harmful noise while speech and warning signals remain audible. This allows employees to continue to communicate safely and effectively. All our models comply with the strict European standard EN 352-2:2020 and combine protection with high wearing comfort. This way you fulfil the legal obligation and protect employees against permanent hearing damage.

## Tailored to your needs

We offer filters with various protection levels. A lower attenuation level is suitable for environments where communication is crucial, such as workshops or warehouses. A higher attenuation level offers maximum protection in extremely noisy environments, such as metalworking or working with heavy machinery. This ensures optimal hearing protection, without compromising safety or comfort.

# The Right Hearing Protection for Every Team

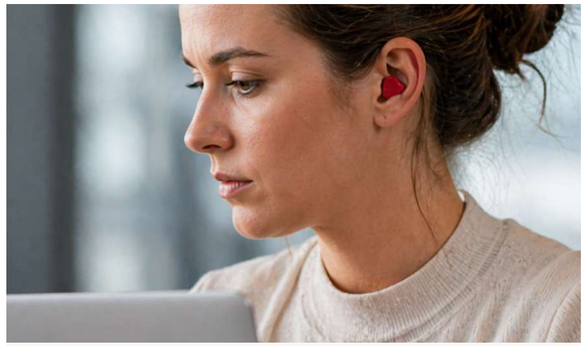

Together with our partner Alpine we supply high-quality custom hearing protection. All our custom ear plugs offer excellent wearing comfort and optimal protection against harmful noise. Regardless of your employees' activities, we help you choose the right earplugs and filters, so they can work comfortably, safely and effectively.

## WorkSafe

WorkSafe offers a strong level of noise reduction that keeps out the harmful sounds of tools and equipment.

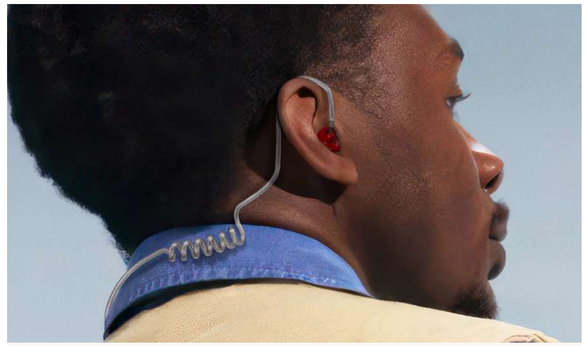

- Custom work earplugs
- Choose between 24, 25 & 29 dB
- For general work activities

## Focus

Improve the concentration of your employees with custom focus ear plugs. Even in busy environments.

- More focus, less absenteeism
- Choose between 22, 23 & 24 dB
- Perfect for busy offices

## Security

Security earplugs are designed for situations where both protection and communication are essential.

- With walkie-talkie connection
- Choose between 24 & 25 dB
- Essential for communication

## MusicSafe

MusicSafe has linear filters. This ensures hearing is protected without distorting the music.

- The best choice for music
- Choose between 19, 22 & 26 dB
- Minimal distortion of sound

“We were looking for national coverage and flexibility in requesting eye and hearing protection. At Seeh, employees can arrange their own appointments, which gives them freedom and provides us with a lot of convenience.”
Hamer B.V.
Hamer

# Fitting At the Store or On-Site

Fitting of the custom earplugs is always carried out by a trained audiologist and can be done at your location or in a Hans Anders store.

## Fitting in the store

After placing the order, your employees automatically receive an order form. With this form they can go to one of the 200 Hans Anders audio stores in the Netherlands and Belgium to have their hearing protection fitted or checked.

## Fitting on-site

Would you prefer to have the custom earplugs fitted or checked at your location? Then one of our otometrists will visit you. Fitting and checking are completely **free of charge for sessions of 5 sets or more**. You only need to create an order form, after which we will contact you to arrange an appointment.

Schedule your appointment

# Options and Free Extras

All our sets of custom earplugs are supplied with accompanying accessories.
As standard you receive the following extras completely free with every set:

- ✓ Free case
- ✓ Free cord and clip
- ✓ Free personalisation
- ✓ Free choice of colour and hardness

## Free personalisation

Earplugs are easily lost or confused with those of someone else. Our custom earplugs are each individually marked with a unique number and your own first name. This makes the owner always easy and quickly traceable.

## Alpine Clean Spray

Most popular

To extend the life of your custom earplugs and prevent ear complaints, it is advisable to clean them after use with the Alpine Clean Spray.

## Detection bullet

A detection bullet is a metal ball that is incorporated into a custom earplug so that it can be detected with detection equipment when it is lost. Particularly used where strict requirements apply to product safety.

Choose the Right

# Prescription Mask Glasses

# Prescription Mask Glasses

A full-face mask only works when it fits properly. Seeh supplies prescription mask glasses that are specially tailored to your mask and prescription. This ensures optimal wearing comfort and always sharp vision.

### NEN-EN 136:1998 standard

Our mask glasses prevent unnecessary edge leakage and comply with the EN 136 standard

### Highest quality

All our mask glasses are supplied in collaboration with market leaders Drager and MSA Safety

### Comply with regulations

With our mask glasses you comply with the right laws and regulations.

### Protection for every sector

We supply mask glasses for various industries, so everyone can work protected

# Prescription Sunglasses

for your team

# Prescription Sunglasses

Every employee has a different prescription and carries out different work. Together with Hans Anders we therefore offer a wide range of prescription work sunglasses, so every employee receives the right protection.

Employees choose from single vision or multifocal lenses, tailored to their personal situation. For employees without a prescription or who wear contact lenses, we also supply work sunglasses without prescription.

**Sunglasses and the Working Conditions Act**

UV radiation is a recognised occupational risk. Do employees regularly work outdoors in sunlight? Then sunglasses are personal protective equipment for which the employer is responsible. If exposure to sunlight cannot be prevented, for example by organising work differently, then the employer is obliged to make suitable sunglasses available.

# Arrange Eye and Hearing Protection in 4 Simple Steps

Arranging good eye and hearing protection does not have to be complicated. That is why our ordering process consists of 4 simple steps.

### 1. Register your company

Create a business account and gain access to the Seeh Portal. Here you manage all orders, set budgets and effortlessly maintain control over the safety of your employees.

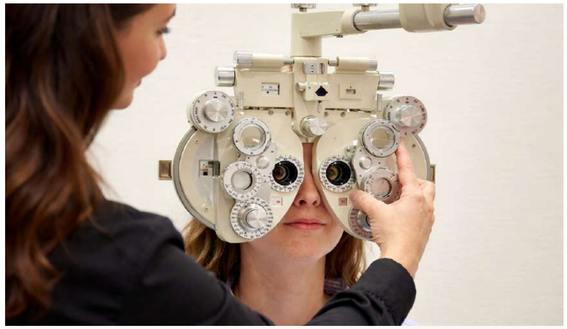

Request Business Account

### 2. Select your products

Determine the right products and services to put together a budget-friendly package for your team. The Seeh Portal keeps everything clear and ready for use.

Download Price List

### 3. Fitting and ordering

Your employees can visit over 400 Hans Anders stores for precise measurements and expert advice, so they always receive the right protection.

Find a store nearby

### 4. Delivery and invoicing

Your employee receives a notification and picks up the product. The invoice is automatically processed in the Seeh Portal, so you have less administrative work and always maintain oversight.

Discover how it works

# Frequently Asked Questions

### What should an employer reimburse?

Following laws and regulations, every employer is obliged to let employees work safely. This means employees have the right to reimbursed optical aids or protection as soon as the work situation requires it.

Read more

### How can I register my company?

As a business customer you arrange everything around tailored protection. Register your company via our website and gain immediate access to the Seeh Portal. There you manage orders, set budgets and track usage per employee.

Request Business Account

### Do you have more questions? Visit our knowledge base

Working conditions legislation, prices and obligations sometimes make it complicated to make the right choice. That is why we have an extensive knowledge base in which we answer these questions clearly and practically.

Discover our knowledge base

# Our Experts Help You Step by Step

Do you have questions about our safety glasses, certification, regulations or anything else? Do not hesitate to contact us. Our specialists are available every working day to answer all your questions and provide you with the information you need.
