Prescription safety glasses

Exclusive partner of

 **HANS ANDERS**

All frames comply with the strictest standards.

Seeh | Prescription Safety Glasses 1

You want glasses you can trust. That's why every frame is certified according to the strictest standards. Always marked correctly and always tested to the highest standard. Our glasses offer more than protection. They are tested for impact, scratch resistance and optical clarity. And they are comfortable to wear, all day long.

You know that you are choosing security and you experience safety and peace of mind with every assignment. This way, every frame meets the high standards you set for your organisation.

Discover our plastic frames.

Our plastic safety glasses offer protection during various activities. The material is lightweight, making the glasses comfortable to wear, even during prolonged use. The frames are also strong and impact-resistant, offering protection against flying particles or splashes.

Integrated side shields

This makes the frames visually calmer and technically stronger.

Stylish & representative

In line with the high standards of your organisation.

Light frames

Extra comfort, without compromising on safety.

Larger lenses

Large lenses provide even more protection.

SH001

Matte Black

Seeh | Prescription Safety Glasses 3

Minimal engraving, maximum protection.

All prescription safety glasses must have an engraving on the lens. This engraving contains the ISO code that shows that the glasses comply with international safety standards. It is a legally required that this marking is clearly visible. This allows for immediate verification that the glasses are correctly certified, giving users and employers additional assurance that the glasses offer the right protection in professional environments.

A keen eye for the world.

Seeh | Prescription Safety Glasses 21

Our safety glasses are durable and prevent waste. We limit waste and energy consumption and use recyclable materials wherever possible. All accessories are made from 100% recycled PET bottles.

This way, you combine reliable eye protection with a greener future. Our solutions comply with recognised frameworks such as ISO 14001 and help organisations translate their sustainability ambitions into tangible improvements for people, the environment and society.

MADE FROM
RECYCLED PET

Your employees are welcome in more than 400 stores.
