Explanation glasses

We understand better than anyone that not only the price but also the quality of prescription safety glasses is important. The glasses should be highly comfortable to wear and provide the best protection against external impact. If you wear glasses, you opt for prescription safety glasses. We have single and progressive safety glasses. Multifocal glasses are also known as varifocal glasses.

Single-vision

Single-vision glasses are spectacles for better near vision or for better far vision. Single-vision glasses for near vision have a plus prescription in the lenses. This allows you to see sharply up close, for example to read a book. Single-vision glasses for distant vision have a minus prescription in the lenses. This allows you to see sharply in the distance, for example while driving. So single vision lenses have only one prescription.

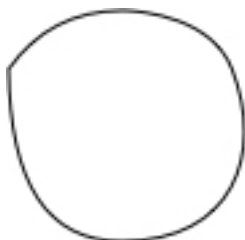

Multifocal

Multifocal glasses allow you to see well both far away and up close. Multifocal lenses combine different prescriptions in one lens. Depending on where you look in the glasses, you can see very well at different distances: at reading distance, intermediate distance and far away. Without having to change glasses. Multifocal lenses (also called varifocal lenses or progressive lenses) allow you to see sharply both near and far.

Multifocal optimal

When you want the best of the best, you choose the progressive optimal lenses. These lenses ensure the greatest wearing comfort, thanks to the large field of vision without distortion. Visual acuity is maximum in every direction of vision, giving you the most natural and stable vision. Thanks to individual customisation, excellent depth perception is also guaranteed.

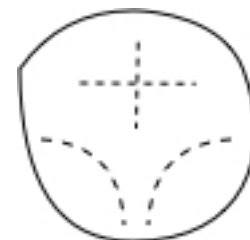

🕒 As many as 85% of people over 40 need progressive lenses.

Trivex lenses

We fit every pair of safety glasses with Trivex lenses. Our lenses for prescription safety spectacles comply with the EN166 standard and offer impact protection in combination with the sturdy frame. In addition to high impact resistance, Trivex lenses offer the added advantage that they can be ground thinner than normal lenses without compromising safety. This allows your employee to work with safety glasses that not only ensure clear vision but also a suitable lens thickness.

	Our standard safety glass	Other glass materials		
	Trivex	Polycarbonate	CR39	Tempered glass
Lightweight	★★★★★	★★★★★	★★★★★	★★★★★
Mechanical impact	★★★★★	★★★★★	★★★★★	★★★★★
Scratch-resistant	★★★★★	★★★★★	★★★★★	★★★★★
Resistant to chemical action	★★★★★	★★★★★	★★★★★	★★★★★
Resistance to sparks	★★★★★	★★★★★	★★★★★	★★★★★

Explanation coatings

During certain activities, harmful substances and/or materials are often released that we do not take into account. Our safety glasses protect your employees' eyes. In addition, our safety glasses are known for their high wearing comfort. You have come to the right place to buy prescription safety glasses.

Scratch-resistant

Prevents scratches on your glasses

Supercoat

Anti-static, moisture-, grease- and dirt-resistant

Anti-reflex
